***Election/Restrictions***

1. Applicant's amendment filed on 06/22/2006 is acknowledged.
2. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

3. In accordance with 37 CFR 1.499, applicant is required, in response to this action, to elect a single invention to which the claims must be restricted.

I. Claims 1-13, directed to a method for treating an individual suffering from or having a tendency to develop a food allergy comprising administering to said individual a therapeutically effective amount of a modified food allergen, wherein the food allergen is modified by reduction and alkylolation.

II. Claims 14-15, a food allergen modified by reduction and alkylolation and pharmaceutical compositions thereof.

4. The inventions listed as Groups I-II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

Groups I-II lack unity of invention because even though the inventions of these groups require the technical feature of a modified food allergen, this technical feature is not a special technical

Art Unit: 1644

feature as it does not define the contribution over the prior art of WO 02/074250 (Reference 5; IDS filed on 08/22/2006).

WO 02/074250 teaches a food allergen modified by reduction and alkylolation, pharmaceutical compositions thereof and methods of allergy treatment (In particular, page 3, line 24 to page 4, line 30 and claims 11-12, whole document).

The reference teachings anticipate the claimed invention.

Since Applicant's inventions do not contribute a special technical feature when viewed over the prior art they do not have a single general inventive concept and so lack unity of invention. The election of an invention may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse. Traversal must be presented at the time of election in order to be considered timely. Failure to timely traverse the requirement will result in the loss of right to petition under 37 CFR 1.144. If claims are added after the election, applicant must indicate which of these claims are readable on the elected invention.

If claims are added after the election, applicant must indicate which of these claims are readable upon the elected invention.

Art Unit: 1644

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
